

With a view to the future: change of legal form and expansion of the management at TRIGA-S

Habach (BY, Germany) on November 3, 2022: The specialist for diagnostic studies, TRIGA-S Scientific Solutions, changes legal form from e. K. to GmbH. Company founder Sabine Radiske will remain as CEO, and Dr. Andreas Franke is appointed second managing director.

24 years ago, in October 1998, TRIGA-S started as a sole proprietorship in Habach. Since then, it has grown into a medium-sized company with over 100 employees. The continuous expansion of TRIGA-S has made a change of its legal form necessary, which has now been completed, to create a solid basis for future investments.

As of November, 2022, TRIGA-S will also rely on a strong management trio: Dr. Andreas Franke now takes over the management together with Sabine Radiske, and Christine Hutter is appointed as authorized signatory.

"Dr. Franke has been in charge of our project management department since January 2019, and also very successfully the operative business for almost two years. I am very happy to have Dr. Franke as the new managing director for the GmbH and I am confident that we will continue to develop TRIGA-S in a future-oriented manner in this constellation.", says Sabine Radiske.

Dr. Andreas Franke adds: "I am very much looking forward to this exciting role and to growing further with the great TRIGA-S team. I am convinced that we will continue to write the success story of our company in a sustainable and innovative way.

About TRIGA-S Scientific Solutions:

TRIGA-S is a Contract Research Organization (CRO) with in-house BSL2 laboratory, specializing in in-vitro diagnostics. Our high quality is ISO 13485 and 9001 certified. As an established service provider, TRIGA-S offers tailor-made solutions for many types of studies: from exploratory studies to feasibility studies and IVDR performance studies. In 2020, TRIGA-S was awarded "Bavaria's Best 50". More information about TRIGA-S here: www.triga-s.de
